Ryan Baltodano

Design Engineer, AI Products

Tampa, FL | Open to NYC / San Francisco relocation | rbaltodano337@gmail.com | (407) 724-5063
ryanbaltodano.com | github.com/rbaltodano | angrove.app | invectus.app

Design engineer who takes AI products from Figma systems to shipped SwiftUI, React/TypeScript, and Rust code. Independently designed and released two local-first AI products: an on-device AI study harness in public iPhone beta and a desktop research tool released for macOS. Two years of professional web design at PostcardMania.

Independent Engineering Projects

inVectus | Independent Creator, Designer & Developer | Oct 2026 - Present

Local-first desktop tool that finds coverage gaps in research collections. v0.1.0 released for macOS with a one-line installer; Windows/Linux beta in testing. MIT licensed.

Stack: React, TypeScript, Tauri, Rust, DuckDB, LanceDB

- Architected a local research workspace with typed React/TypeScript screens, a Tauri command boundary, and Rust engine crates shared by the desktop and CLI; designed import, map, and evidence-review flows.
- Applied semantic retrieval and embedding-space coverage analysis to document collections; kept scores and source evidence inspectable, with experimental assessments scoped to the indexed collection.
- Implemented keyboard-resizable panes with narrow-window stacking, persistent bookmarks and decisions, and resumable indexing; added navigation, map-focus, search-presentation, and layout regression coverage.
- Set up release tooling: cross-platform GitHub Actions CI, installers with install smoke tests, and a macOS signing pipeline; designed and built the invectus.app product website.

Angrove | Independent Creator, Designer & Developer | Apr 2026 - Present

Private, on-device AI study harness. iPhone public beta on TestFlight; native Mac app in development.

Stack: Swift, SwiftUI, Core ML, MiniLM, LiteRT-LM

- Created the Figma visual and interaction system and SwiftUI flows for branching conversations, contextual definitions, and a semantic map of saved Insights; built spatial study Boards on Mac.
- Architected shared feature logic and design tokens for iPhone and Mac; integrated local generation, Core ML embeddings, cosine-similarity retrieval, and AES-256-GCM storage with Keychain-managed keys.
- Coordinated model work through one cancellable queue; used stable conversation and branch IDs to preserve late answers after navigation, with persistence and retrieval regression coverage.
- Compared thinking on/off across 80 development cases on simulator CPU: both totaled 74/80 objective passes; roughly doubled median answer time supported leaving thinking off by default.

Professional Experience

Web Designer | PostcardMania | 2024 - Present

Design and deliver custom, responsive client websites, translating business requirements into individualized layouts and managing client-facing delivery deadlines.

Front-End Web Development Intern | Cloud Carpenter | 2024

Designed and built responsive client websites and interactive features with HTML, CSS, JavaScript, and PHP in collaboration with a development team.

Customer Service Staff | Publix | 2021 - Present

Technical & Design Skills

Design: Product design, UI/UX, interaction design, Figma, prototyping, design systems, responsive interfaces

Frontend & apps: React, TypeScript, JavaScript, HTML, CSS, Swift, SwiftUI, Tauri

Engineering: Rust, Python, PHP, Git, SQLite, DuckDB, LanceDB, application architecture, regression testing

Applied AI: Model integration, embeddings, vector similarity, semantic search, retrieval-augmented generation, evaluation

Education

B.S. in Information Science | University of South Florida | 2023
Concentration in Information Security
